Intel Drop #56

The following was collated from a few wide-ranging conversations covering many topics. As always, all intel sent by Gideon is edited by Michael for clarity and for obfuscation purposes (see: Stylometry):

Bill: We've delayed this Intel Drop because we want to make sure we get the most up to date information, since so much is going on. Is tonight a good time to go over some of the more recent events?

Gideon: *"Yes, I have time now, we can proceed."*

Bill: I'll just start by asking you to give a general assessment of what's going on as we start the New Year of 2025.

Gideon: *"The agenda is moving forward as we have predicted, not only with public things the cabal has shown us, but things I have learned through my sources."*

Bill: I think the confirmations have been incredible lately. We said X / Twitter would be a major conduit for Obsidian two years ago, and now just after the clock ticked us into 2025, everything changed on X.

Gideon: ***“It most certainly did."***

Bill: I've documented it on my Twitter, I recommend readers take a look at my past four or five Tweets. We had multiple reports of a social credit-type of system being deployed within X. It's truly incredible to see it. This is the initialization of Obsidian, isn't it?

Gideon: ***"It is. It is not complete or finalized, but as we privately told our team months ago, Obsidian's official launch date was January 1st, 2025. That is the date we shared with them, but we did not speak of publicly. It has now passed. I believe that was fulfilled by the cabal. Obsidian is now effectively online, as it integrates into thousands of apps, banks and monitoring services."***

Bill: Now X is really showing its true purpose to the users, giving them a special "social score" and so on. It sounds exactly like Obsidian. How closely do you think what's come out will match Obsidian's actual interface once it's fully public?

Gideon: ***"These are testing phases for X. The actual launch will not likely look like this, and it may not involve a 'score' or a number. The A.I. system is calculating the reactions to this, what has been shown so far. My understanding, as well, is that the cabal wants more people to join X. They do not want to launch until millions more sign up for it. With Trump and Musk pushing it so heavily, I expect it will grow rapidly over the next six months."***

Bill: When will people actually know it's online, I mean the real launch?

Gideon: ***"The public launch, based on our best intel, is late Summer of 2025. We will see some significant transitions by then, especially with X payments and the first, public utilization of USDR."***

Bill: We're seeing reports all over the world of "digital ID" type systems being deployed across all kinds of modalities and interfaces. We post these updates in our CSRQ News Telegram, but it's almost too much to list. To me, that's just Obsidian coming online.

Gideon: ***"We know for a fact that it is."***

Bill: I want to get to some more recent events. Trump was just inaugurated, and the whole event seemed off to me, very strange. We talked earlier about it, you saw it, what's your reaction?

Gideon: ***"There were ritualistic clues present, things that will need to be carefully deciphered. Many noted Trump did not place his hand on the Bible. This was significant."***

Bill: I looked that up, and it's very rare in American history for a President not to place his hand on a Bible. What does it signify?

Gideon: ***"I cannot say, but I am sure we will explore the reason as time goes forward. I can say for certain, the entire transition for the Trump Administration, thus far, has been draped in cabal ritual and bizarre messaging."***

Bill: What about Trump's meme crypto coin he released? As well as his wife's? What do you think of all of that? I have my opinions, which I shared on our Telegram.

Gideon: ***"The meme coin is ploy to gain fiat to purchase USDR for Trump's family and insiders close to them. I have said in the past the cabal is doing many things to rapidly gain fiat for the purchase of USDR. We have seen major financial scams, such as FTX, we have seen huge movements of money through cryptocurrency, in the many Billions, to unidentified wallets, which would be connected to Obsidian. Later, the whistle blowers were able to confirm and triangulate for me as to their true destination. We could prove the funds were going into Obsidian."***

Bill: I looked into the coin itself, and we can see this LLC connected to Trump controls 80% of the supply of the coin. That means, with its market cap reaching into the many Billions, they control that money.

Gideon: ***"Indeed. The coin's metrics break with traditional, more secure and reputable meme coins in that the supply is controlled by a handful of entities, rather than being dispersed to its holders. In any other case, if it was not the President involved, the coin would be considered a high risk token, if not entirely dismissed as potential scam."***

Bill: Well, many people at first thought his account had been hacked, since it looked so sketchy. Then his son, Eric, confirmed it was real, then they released the Melania version, which was even more sketchy.

Gideon: ***"It is an appalling misuse of his public position for personal gain. The coins were not released properly, not audited, not vetted, as is standard with other major cryptocurrencies, and even standard with the release of prior, popular meme coins.***

The insiders who control 80% of the supply will continue to sell into any positive gains. It is a type of a scam, due to the fact they control so much of the supply. They will simply convert the fiat gains into USDR."

Bill: There's been a fairly negative reaction to it. What's the play here? Why would they do this?

Gideon: ***"It has multiple purposes. It is a way of telling the public they are being fleeced. It is a way of gaining fiat to acquire USDR through Obsidian. It is a way of producing something that is rather transparently predatory, avaricious. It is a message, a signal.***

I believe it represents something they will do to America, eventually, it is a symbolic fleecing and looting."

Bill: I'm going through my list, trying to get to other things, before we do that, I wanted to mention that in a recent rally speech Trump said they "rigged" the election for him, he said it twice. Did you see that?

Gideon: ***"No."***

Bill: I'll share that with you now. Take a look at this.

Gideon: ***"I see. One wonders if it was intentionally placed in his remarks. He often has a teleprompter, but goes off script, as well."***

Bill: I think he said it once before in the past, I'm sure Elon said something about Pennsylvania being rigged in some way. I think it confirms what you said about this months ago.

Gideon: ***"Yes, I have discussed that at length in past Intel Drops. It was a partial rigging, but the actual vote count was not drastically altered. Everything up to that point was a psychological operation to ensure he won, however.***

For him to say 'rigged' twice is very unusual. It is either a subconscious 'tell' or he is revealing the truth. The cabal often simply tells us the truth, a departure from the past. I have discussed that at length, as well."

Bill: There's a disenchantment with Trump I noticed. I see some Trump supporters not happy with him, not happy with his cabinet picks, who are all Israel-Firsters or cabal insiders, so I see this push-back. That brings me to his first decisions today, with his executive orders. Were you able to review them?

Gideon: ***"I just was, yes."***

Bill: Ok, well, they're sweeping. You might say, he kept a lot of campaign promises. They seemed to be done to shore up the lagging support, if you want to look at it that way. It's like they wanted to infuse his supporters with some faith again in him. Am I reading that right?

Gideon: ***"You are. However, there were some questionable exectuive orders as well. It appears they did some things to shore up the support, as you mentioned, but also to further the agenda."***

Bill: I saw that. I saw some other E.O.'s, too, that were concerning, buried among the good ones. Everything up to this point has been dispiriting. He met with BIll Gates the past week, that meeting seemed to go so well, they all said, then he releases the grift meme coin, then today he doesn't put his hand on the Bible, then Eric Trump makes a clear Illuminati hand signal and his wife then stops him, but by the end of it, Trump does these executive orders, that on their face, seem to fulfill campaign promises. So, it was just this wild swing in terms of actions and behaviours. I wondered, is this the A.I. doing this?

Gideon: ***"The Administration and his team rely on the A.I. for direction. With the A.I. the cabal is using, along with the Hex apparatus, these things are being done more rapidly, targeting key demographics or reacting to the prevailing sentiment in a real-time basis, rather than in the past when the cabal relied on public polling or slower analog methods."***

Bill: Ok, I don't want to spend too much time on Trump. I think we know what's going on. He's serving the agenda. I want to focus more on Obsidian. You told me we need to do more to issue warnings. Can you get into that?

Gideon: ***"Yes. My guide has impressed upon me we do need more individuals for our team, people we need to reach. We also need to emphasize the urgency at hand. Our team is here to help. We do have extraordinary access to Obsidian through the whistle blowers. We want to utilize that access in every way we can to benefit and prepare our team.***

One area we believe we are lacking is in the area of where certain team members are located geographically. To defeat the cabal, we need people all over the world, in key places, particularly where the cabal will be operating once the Reset happens. We need more team members from certain countries. So, that is a priority now."

Bill: What would those places be?

Gideon: ***"Argentina, which is becoming a key cabal country of operation. The Netherlands, Switzerland, Singapore, The United Kingdom, certain states in the United States, particularly Colorado, Virginia, Maryland, Florida, Texas and New York, and some cities in the Middle East, such as Dubai, Tel Aviv and Amman.***

We need team members in place in these areas, and right now, our team is not fully staffed in these areas. So, if there are those reading now who believe they can be of help in these locations, please contact us."

Bill: What can people in those places do, in terms of after the Reset, to help us?

Gideon: ***"They will be in position to attend cabal events. As Sovereign status individuals, they will have certain access. We expect they may be invited to galas,***

events, meetings, and so on. We will not send anyone on our team into harm's way, of course, unless they are prepared and properly trained. There will be dangers. If a person is prepared to make that call, that decision, we will need to proceed with that."

Bill: How risky will that be? I mean, let's say one of our team members goes to a cabal event, like a gala, what would happen?

Gideon: ***"I would prepare them for that. For us to be effective at destroying Obsidian, at bringing down the cabal, there will come a time that we will need to engage in infiltration and espionage techniques. Not everyone on our team has that kind of training, but some do, and others have skill sets that can be utilized.***

***Our team** is not large. Over the past three years, only a few dozen have been accepted. My guide has impressed upon me the need to grow our team, and the whistle blowers have come to agree to some terms in editing new accounts to Sovereign status. I think they understand the urgency, too."*

Bill: What about the urgency with USDR? You mentioned that to me. You said people don't understand what's happening in the crypto markets at all.

Gideon: ***"I did not intend to make that point here, but if is to be discussed, no, no one is prepared. The cabal is going to engage in a grand deception, in which people will lose their wealth but gain something else through Obsidian.***

There is a concern Musk and Trump will present an 'alternative' financial system, through Obsidian, and lure the United States and the rest of the world into a deceptive trap. This would align with something I told you some time ago, that the cabal may release the new financial system alongside the current one, then do away with the current one, more slowly."

Bill: Right, you said they might tie USDR into some kind of false gold standard, something a lot of American patriots might find appealing.

Gideon: ***"Yes, correct."***

Bill: What do the whistle blowers think of this?

Gideon: ***"They have directly told me they believe this is going to happen, based on their work on Obsidian. They do not have all of the details, due to extensive compartmentalization, but they can see enough."***

Bill: There's people asking me about these crypto coins with the symbol "USDR". We've warned people over and over this has nothing to do with the real, cabal coin, which is classified.

Gideon: ***"There are thousands of crypto coins with many common names. Anything named USDR has nothing to do with the real future digital currency. We also expect by the time it is publicly released, it will not be specifcially called USDR, though that is the most likely name."***

Bill: Do you think Trump's meme coin was also a way to get more people familiar with crypto, so when USDR comes out people will be comfortable it? Maybe the older generations?

Gideon: ***"That is entirely possible."***

Bill: What about XRP? It made another resurgence. People really think its the future digital currency. Can you address that again?

Gideon: ***"It is not. It is a cabal project to gain fiat wealth, as are the majority of cryptocurrencies. The cabal creates certain narratives to bring in investors and adherents. The XRP adherents are convinced of a certain narrative that has no basis in reality.***

The cabal would also not allow people to become wildly rich by holding XRP, even if it did become the future digital currency, in the same way the real one, USDR, is not available to the public at all."

Bill: It's interesting how USDR's intrinsic value is being fulfilled in terms of the cabal's effort to essentially steal fiat through all of these different ways and then more or less buy USDR inside of Obsidian. You've said it's a ritual and symbolic for the cabal.

Gideon: ***"The true value of USDR, for the cabal, is what is happening now through the in-flow phase. While not all of the funds submitted were ill-gotten, a great deal are, especially with recent financial moves. Much of it has come through cryptocurrency, which the cabal controls, and the exchanges, which they control."***

Bill: There's a big secret behind USDR, are you ready to discuss that or not?

Gideon: ***"Not at this time, except to say the group I have been working with has a better understanding of this issue."***

Bill: Did that group do away with the person you were against? The one you didn't want involved?

Gideon: ***"They have. He has been dismissed, much to my relief. Some things were discovered that he had done, as well, which corrupted and has delayed their own project."***

Bill: I'm really glad to hear that. I think what they're doing is incredible. I hope they go more public with it soon.

Gideon: ***"They intend to."***

Bill: I know it's late and we didn't have much time to talk. Thank you for getting us some updated insights on all this. We have some previous discussions we'll include in Part 2. Is there anything you would like to say to our readers to end this?

Gideon: ***"My statement to those reading is that if you believe you can help us, if you believe you can help fight Obsidian once it comes online, we want to consider you for our team. We have a plan to stop this. We have people on the inside helping us. We have a chance to do something important here. We need good people who can help."***

Bill: Thanks, and for those wondering what Part 2 will be about, it goes very deep into what the cabal is actually doing that no one is seeing right now, so hopefully we get Part 2 posted soon, it's going to be incredible information, a much deeper discussion than this one, since we didn't have much time to talk.

Gideon: ***"It is critically important we publish Part 2 in its entirety. I understand Michael is editing our prior conversations, so I look forward to that."***

Bill: Me too. I'll let you go, we'll talk again soon.

Gideon: ***"Blessings to you as always, and prayers for us and our team."***

Bill: Amen. Goodnight.
